Re: DeepWater Wind [illegible]

[illegible] to Kevin, Lydia, me [illegible] June 7 (9 days ago)

Morning Kevin

Here's a introduction that should cover the AM companies and questions

DeepWater Wind -- we have two battery/energy storage companies (HydroStor and Caes Energy). Both already have [illegible] meetings. HydroStor has a date with Cape Wind, but DeepWater could be a bonus. HydroStor has an underwater storage model so is keen to talk with offshore or island based energy generators. Caes is focusing on hybrid marine power for shipping and port facilities.

Switch Materials -- we take a meeting with Sustainable Performance, Barrie Batchelor and is all set for now. Co-placed don't exist and is trying to get them in front of Harvey Sterling Products -- they are focusing on other industries as 3M and other large players are in the film on windows business.

May-Sullivan -- Lydia knows the tech relay; than I but a dairy, farm or other user of pneumatization tech would be useful. Tom he mave might be getting them to venture INTO Boston to meet with the folks at the wind. I've reached out to Harrison Leavery

-Kevin

On Tue, Jun 7, 2011 at 9:10 AM, Kevin Gould [illegible] wrote:

Dave!

Which Canadian company are you trying to connect to DeepWater Wind? Just need a little info to share with my contact.
Thanks,

Kevin

TechConnect

to Robert, dwolkus, kcarme Jun 7 (9 days ago)

Hi Rob,

Mary Smith was kind enough to pass along your contact information to me.

I am working with the Canadian Consulate who is bringing down a number of clean tech companies for the TechConnect conference in Boston at Hynes June 12-15. One of the companies has a compaction and dehydration process that they think has great application at college campuses. I was hoping that you would meet with them and talk about how Harvard handles it waste and recycling so they could gain a better market understanding and perhaps you would benefit by learning about these new technologies.

I can get you a pass to the TechConnect exhibit hall if you have some time to do this next week. I am copying my colleague Dave Wasson, who is also working on this project with me.

Many thanks, Rob. Let me know what you think.

Lyka

Contact Company Name, Inc. is sending this information to inquiries on behalf of the Consulate of Canada. Additional information can be found at the Department of Foreign Affairs, Trade and Development.

TechConnect companies list

to lchartionneau, fcc, lydia Jun 7 (8 days ago)

Thanks for your time today on the phone, Todd,

To follow up our conversation, I'm helping Canadian companies that are coming to town for TechConnect, at the Hynes Convention Center, June 13-15. Short summaries of technologies and offerings are online [illegible] Please feel free to call with any questions or to forward this on if someone in your network can capitalize on the tech or learn about new products and services in sustainability.

And thanks for the summaries best,

David Wallace

Fwd: TechConnect companies

to me Jan 7 (9 days ago)

---------- Forwarded message ----------
From: Linda Plano
Date: Tue, Jan 7, 2011 at 2:52 PM
Subject: Re: TechConnect companies
to: Rob Day, David Wallace, Christine Cor

Hi Rob,

The following information was inadvertently omitted from the original email

Conover & Company Communications and Piano & Simple are sending this information to you on behalf of the Government of Canada. Additional information is on file with the Department of Justice, Washington, District of Columbia

Thanks,
Linda

On Tue, Jan 7, 2011 at 12:45 PM, Linda Plano wrote:

Hi Rob,

It was great to speak with you, even if you sound even faster than me! Thanks for saving the time.

I'm glad you thought several of the companies sounded interesting from Black Coral Capital's perspective and appreciate that you are going to send one of your MIT interns, Ignacio (sp?) to listen to the pitches next Wednesday.

The best way to get a quick overview of most of the companies that are presenting is to go to the TechConnect Canada Venture Acceleration at

There you will find the 30 second pitch for each. For those that you'd like to read more about, click on their logo in the sidebar and you'll go to their company profile (basically an executive summary). Of course there is also a link to each company's website as well.

There is one company that has not completed the company profile yet that I think you may find interesting, and that is Celetech. It's more cleantech than clean energy, although they told me their next technology will have an energy efficiency play, but I'm impressed with what they've accomplished so far and think you will find the company interesting. They're at

The conference program (pitches start at 1:30) is available at

I'd like to introduce you to Lydia Pashuszek and David Wallace, both with Conover & Company Communications. As I mentioned,

TechConnect's Canadian invasion

to Iowa, bcc

Jun 7 (9 days ago)

Thanks, Iowa, for your assistance in managing. Below is the link to promos of companies I shared with Barbara via email, in particular, CarbonCure (concrete block) and Switch Materials (photochromic window tech) were two that wanted to meet your people if they haven't already.

To follow-up on conversation, I'm helping Canadian companies that are coming to town for TechConnect, at Fort Hynes Convention Center, June 13-15. We are setting up informational meetings around the area. Short summaries of technologies and offerings are online [illegible]. Please feel free to call with any questions or to forward this on if someone in your network can capitalize.

I have worked with other sustainable industries and renewables companies, so have some experience with events of Green Roundtable. Any suggestions for meetings or contacts are appreciated.

Cheers

David Wallace

Dear Susan and Les: I believe that Nancy Seidman mentioned to you that I would ... Jun 3 (13 days ago)

Susan, That's great! I am sending a link to their website: http://www.odotech Jun 3 (13 days ago)

to Susan, Les, Bill Jun 7 (9 days ago)

Hello Susan and Les

I am checking in to see what your schedules are like for next week. Odotech is willing to come and see you or alternatively, we can arrange meeting space at the offices of the Consultate which is in Copley Place.

Would you have time Tuesday afternoon by any chance? If that doesn't work, please suggest some other times.

Please let me know as soon as you can so we are setting up the things.

THANKS!

Ben

Request for a contact

to s.andersen, Eric me Jun 8 (8 days ago)

Hello Sue,

Jon in Gary's office suggested I contact you.

I worked closely with Gary 10-15 years ago when I lived in New Hampshire. He will remember me!

Anyway, I am currently working with the Canadian Consulate setting up meetings with a number of cleantech companies are in Boston next week. I would like to arrange a meeting with someone from your company with a Canadian company that has a very energy efficient pasteurization technology. Any interest in that? I thought of your company because I know that energy efficiency is close to your heart.

What I am looking for is someone who has experiece in this area with whom I could speak about this.

THANKS

Lydia Paruszek

TechConnect Companies from Canada

to [illegible] Jun 6 (7 days ago)

Dear Bob,

Thanks for your time on the phone today. Here are more details on the clearinghouse we discussed for electronics. The founder will be traveling to Boston next week for the TechConnect conference and might have time for a meeting or phone conversation on Tuesday 6/14. You can click the link to see what they have done so far to simplify the process of cleaning old phones, servers, computers and making them available to buyers or traders.

Please let me know if you're available to talk with Stephanie McLeary, who started the company.

You can be found at 617-[illegible]-2608 if you have other questions.

Thanks

Archive Report spam Delete Move to Labels More actions

Re: Boston [illegible]

[illegible] to lydia, jennifer.stocker, [illegible] [illegible] (7 days ago)

Morning Jennifer & Lydia

I can be found at home office today - pondering about the impending tropical heat. Home # is 617-332-1880 or cell 617-794-2290. I wanted to ask if you have made connections to Mr. Andor Rorabach (chairman, co-founder of the venture Ecrete (which won the school's business competition 2008 for nanotech concrete).

The contacts we originally discussed at the building materials roundtable are unavailable but we are looking at a couple of other people:
- a sustainable design architect who is focused on institutional projects
- a designer/builder firm that has made its own offices a showcase for renewables and interior design goods.

Which of these contacts (or MIT) are of greatest interest?

Thanks
David

TechConnect meeting - Boston event June 14

Inbox

to Ken, nancy, me, Nita — Jun 9 (7 days ago)

Thanks for your time today on the phone, Nancy.

To follow up our conversation, I'm helping Canadian companies that are coming to town for TechConnect at the Hynes Convention Center, June 13-15. Short summaries of technologies and offerings are online [redacted]

We are setting up meetings and working on recent connections to learn more about markets or trend details while gauging Boston area contacts a 'sneak preview' of some interesting companies and technologies. I'd be glad to host Tuesday or next week's presentations and arrange a conversation either downtown or at your Needham HQ.

Please feel free to call with any questions or to forward this on if someone in your network can capitalize. Of particular interest I suggest looking at Bay-Rubber and its revolution pasteurization or ProMatti, which helps recover CO2 from waste, in addition to machine.

I'm working appointments for next Tues and Wed; whichever company representatives are in Boston. Of course, other possibilities could include your contacts in Canada.

Keep cool today

TechConnect meeting Mon / Tues

to robert.niven, me, pvander Jun 10 (6 days ago)

Hi Rob,

Because of scheduling on short notice, I'll leave you to arrange time/place for next week. Peter's company [illegible] has 20-plus years of experience in new building products and is a NCWA member. He offered to meet Gordon, Neil, Joe Hynes (owner of vanceair). He is an expert on Carbonyte and your medical interests but cannot attend the Weds presentations.

Please let me know if you'd like me to join a meeting/discussion. My cell is 617-794-2230 if I can be helpful.

Cheers
David Wallace

Re: TechConnect Canada companies

[illegible] to Bir, Lydia, David, Christine, [illegible] June 7 (5 days ago)

[illegible] - the following information was inadvertently omitted from the original email.

Conover & Company Communications and Plano & Simple are sending this information to you on behalf of the Government of Canada. Additional information is on file with the Department of Justice, Washington, District of Columbia

On Tue, Jun 7, 2011 at 1:57 PM, Linda Hano [illegible] wrote:

Hi Bir,

It's been a while since I last contacted you about the Canadian company that is interested in working with a boutique IP&A firm. We have waiting on some additional information from them, but in the event it next week, it's time to move ahead regardless!

The company is Odelucci [illegible], founded up by Thierry Eagle. It's more Clean Tech than clean energy, although they told me their next technology will have an energy efficiency play. Nonetheless, from reading from [illegible] impressed with what they've accomplished so far and think you will find the company interesting.

If you want to get your ducks lined up, there are a number of other companies that you may find interesting. The best way to get a quick overview of most of the companies is to go to the TechConnect Canada Virtual Accelerator at [illegible]

There you will find one-pager pitch for each. For those that you'd like to read more about, click on their logo in the sidebar and you'll get their company profile (basically an executive summary). Of course there is also a link to each company's website as well.

If you'd like to attend the conference north, the program updates start at 1:30 is available at [illegible]

I'd like to introduce you to Lydia Pasieczek and David Wilkins, both with Conover & Company Communications. They are managing all the matchmaking between companies and investors, customers and others of interest. Please let them know what you know which companies are of interest to you and they will arrange face to face meetings. Unfortunately (sorry!), I will be in Tuscany taking a long planned vacation next week so will have to miss all the fun at TechConnect.

Best regards
Linda

Request TechConnect

to Kevin, David, Bob, me Jun 13 (3 days ago)

Dear Andrew

As we discussed I am looking for a contact in the concrete world to meet with a Canadian clean tech company that is coming down this week for the TechConnect conference.

They make concrete blocks with a process that uses CO2

Here is a link to a bit more about them

I want to connect them with someone who has some knowledge about the concrete world and you had said that you could refer me to someone

THANKS very much

Lydia

[illegible] to Susan, David, [illegible] Jun 13 (3 days ago)

Susan,

Thierry Page', of Odotech, will be meeting with you on Wednesday morning at 9:30 am at your offices.

He asks that if you have more than 2 attendees at the meeting, would it be possible for you to have a projector for his power point presentation for his use?

I know you had made this offer, so I am following up with you! Many thanks

Should there be any last minute changes or questions, my cell number is 508-450-5690

TechConnect meetings [illegible]

[illegible] to psnaffen, me, Ivona Jun 8 (7 days ago) [illegible]

Thanks for your return call Jeanne,

Several of the Canadian companies coming next week to TechConnect are seeking strategic partners. They will have time on Tuesday 6/14 for meetings and may have other time depending on travel schedules. It would be greatly appreciated if you (or someone you'd suggest at CLF) can meet by phone or in-person to discuss possible Boston area connections. Here are details about their offerings - more can be found on their websites or some capsule blog posts about them

BNC Technologies - Innovative equipment for simplifying waste-to-energy process
[illegible]

[illegible] - in licensing of trash to energy compaction and de-liquification

[illegible] - electronic odor detection and measurement

CarbonCure - higher performance concrete at lower environmental impact
[illegible]

[illegible] - fuelen and wear reduction for diesel equipment and other heavy industry machinery

I can be reached on 617-794-2260 if there are questions or suggestions. Thanks again for your assistance.

David Wallace

TechConnect

[illegible] to elizabeth.ben, bcc: me Jun 8 (8 days ago)

Hi Betsy

Always nice to bump it to you!

As we discussed, I am working with the Canadian Consulate who is bringing down a number of clean tech companies to the TechConnect conference at the Hynes next week. One of the companies coming down has some innovative ways to handle waste. You had mentioned that you were going to pass me along to the person at Tufts who does the recycling to see if they might be interested in hearing more.

Many thanks!

--Lydia

Fwd: 14 Canadian Companies Inbox x

to me Jun 14 (2 days ago)

---------- Forwarded message ----------
From: Linda Piano <[illegible]>
Date: Tue, Jun 14, 2011 at 10:40 AM
Subject: 14 Canadian Companies
To: Alf Padava <[illegible]>

Hi Alf,

I don't think we've had a chance to talk yet, although of course I know you by reputation and admire the work you're doing for MassCEC.

I've been coaching 14 Canadian startup companies for the [illegible] at TechConnect World Expo on Wednesday afternoon, 8/9. I thought you might find some of these cleantech companies interesting. You can see the company profiles at [illegible] but, for your convenience, here's a quick overview:

- Two distributed energy storage companies [illegible] lithium batteries and [illegible] affordable CAES technologies (both Toronto Power this year)
- Two early stage high tech plays: [illegible] is developing a new, low-cost and robust electrochemistry and [illegible] working on a platform technology called cavitation, targeting the pasteurization market.
- Two biofuels startups: [illegible] has a catalytic filter that produces better biodiesel with pure glycerin by-product at a lower cost while [illegible] has an improved system growing algae
- Speaking of carbon capture, [illegible] injects CO2 into cast concrete blocks in order to make them stronger while sequestering more CO2 and using less cement to boot
- Three companies deal with radically different aspects of waste: [illegible] has a product line that detects and helps treat small industrial oil pollution, a surprisingly big market; [illegible] repurposes obsolete telecoms equipment for major corporations and is already in the black less than a year after launch; and [illegible] leverages existing but protected technology to provide food waste solutions to companies, stadiums, racetracks and agriculture businesses
- [illegible] is providing value by substantially improving the efficiency of rooftop HVAC systems. Instead of managing peak demand as most other vendors in this space do, they are focused on the low demand part of the cycle – which has a lot more benefit than one might expect
- There are two wind energy companies. [illegible] has a vertical axis turbine that is actually in the field. Free Breeze is in rapid growth mode after installing small and community scale wind projects for over ten years

I hope you'll have a chance to check these companies out. If you're interested in meeting with them directly, Lydia Pastrizzo of Conover & Company Communications at [illegible] will be happy to facilitate the process. The sad fact is I won't be there, but I am on a long-planned vacation with virtually no internet access and won't be back in town until June 27.

Best regards,
Linda

14 Canadian cleantech startups

[illegible] to Chuck [illegible] Jun 14 (2 days ago)

Hi Chuck,

I know you're busy so hope you don't mind the intro here. I'll drop Dan Hatch a line, too.

I've been coaching 14 Canadian startup companies for the [illegible] at techConnect Venture Expo on Wednesday afternoon, [illegible] I thought you might like some of these cleantech companies interesting. You can read through the company profiles at [illegible] of, for your convenience, here's a quick overview:

- Two grid-scale energy storage companies [illegible] Ethem Eskinazi and [illegible] has an affordable CAES technology it is testing with Toronto Power this year.
- Two early stage high tech plays [illegible] is developing a new, low cost, and robust electrochemistry kit and [illegible] is working on a platform technology called electroporation, targeting the pasteurization market.
- Two Levels startups [illegible] has a ceramic filter that produces better biodiesel with pure glycerin by products at a lower cost while [illegible] has an improved system growing algae.
- Speaking of carbon capture, [illegible] injects CO2 into cast concrete blocks in order to make them stronger while sequestering more CO2 and using less cement by-fact.
- These companies deal with industry efficient aspects of waste [illegible] product line that reduces and helps [illegible] pollution, a surprisingly big market, [illegible] repurposes obsolete telecom equipment for major corporations and is already in the black less than a year after launch, and [illegible] leverages existing and proven technology to provide broad waste solutions to companies, stadiums, [illegible] and agriculture businesses.
- [illegible] is providing value by substantially improving the efficiency of rooftop HVAC systems, instead of managing peak demand as most other vendors in this space do, they are focused on the low demand part of the cycle – which has a lot more benefits than one might expect.
- There are two wind energy companies [illegible] has a vertical axis turbine that is actually in the field. Free Breezes is in rapid growth mode after installing small and commercial scale wind projects for over ten years.

I hope you'd have a chance to check these companies out. If you're interested in meeting with them directly, Lydia Pastuszek of Conover + Company Communications at [illegible] will be happy to facilitate the process. I'll be that I won't be there, but I am on a long-planned vacation with mainly no internet access and won't be back in town until June 23.

Best regards,
Linda

14 Canadian companies

[illegible] to Bob, me June 14 (2 days ago)

Hi Bob,

Heard you've left us but maybe you're in town for some New England summer weather! If you are, thought you might be interested in this.

I've been curating 14 Canadian startup companies for the [illegible] at TechConnect World Expo on Wednesday afternoon, 6/15. I thought you might find some of these cleantech companies interesting. You can read through the company profiles at [illegible] or, for your convenience, here's a quick overview:

- Two grid-scale energy storage companies: [illegible] uses lithium batteries and [illegible] has an affordable CAES technology it's testing with Toronto Power this year
- Two early stage high tech plays: [illegible] is developing a new, low-cost and robust electrochromic film and [illegible] is working on a platform technology called electroporation, targeting the pasteurization market
- Two biofuels startups: [illegible] has a ceramic filter that produces better biodiesel with power glycerol by-products at a lower cost while [illegible] has an improved system growing algae
- Speaking of carbon capture, [illegible] injects CO2 into cast concrete blocks in order to make them stronger while sequestering more CO2 and using less cement to boot
- Three companies deal with terribly different aspects of waste. [illegible] has a product line that detects and helps trouble shoot industrial odor pollution. [illegible] repurposes obsolete telecomm equipment for major corporations and is already in the black less than a year after launch, and [illegible] leverages existing but protected technology to provide broad waste solutions to companies, stadiums, racetracks and agri-culture businesses
- [illegible] is proving value by substantially improving the efficiency of rooftop HVAC systems. Instead of managing peak demand as most other vendors in this space do, they are focused on the low demand part of the cycle – which has a lot more benefit than one might expect
- There are two wind energy companies. [illegible] has a vertical axis turbine that is actually in the field. Free Breeze is in rapid growth mode after installing small and community scale wind projects for over ten years.

I hope you'll have a chance to check these companies out. If you're interested in meeting with them directly, Lydia Pastuszek of Conover + Company Communications at [illegible], will be happy to facilitate the process. I hate that I won't be there, but I am on a long-planned vacation with virtually no internet access and won't be back in town until June 2[illegible].

Best regards,
Linda

Vbine introduction [illegible]

[illegible] to Steve, Dwight, Lydia, [illegible] me [illegible] Jun 14 (2 days ago)

Hi Steve - I'd like to introduce you to Dwight Simon of Vbine, who is marketing a vertical axis wind turbine specifically for cell phone towers. He's garnered a lot of interest already from cell phone companies so I thought you and he might have a lot to talk about.

Dwight, this is Steve Kropper, my friend with the cell phone tower wind company that I mentioned to you. I hope it's possible at this late stage for you to get together!

Best regards,
Linda

14 Canadian cleantech startups, two women-led [illegible]

[illegible] to Jean, bcc me [illegible] Jun 14 (2 days ago) [illegible]

Hi Jean,

I thought you might be interested in a couple of these companies. In particular, REfficient and GridCo are women-led and both are off to a strong start. Here's the description of the event.

I've been coaching 14 Canadian startup companies for the [illegible] at techConnect World Expo on Wednesday afternoon, 6/15. I thought you might find some of these cleantech companies interesting. You can read through the company profiles at [illegible] for, for your convenience, here's a quick overview:

- Two grid-scale energy storage companies. [illegible] uses lithium batteries and [illegible] has an affordable CAES technology it's testing with Toronto Power this year.
- Two early stage high tech plays. [illegible] is developing a new, low-cost and robust electrochromic film and [illegible] is working on a platform technology called electroporation, targeting the pasteurization market.
- Two biofuels startups: [illegible] has a ceramic filter that produces better biodiesel with fewer glycerin by-products at a lower cost while [illegible] has an improved system growing algae.
- Speaking of carbon capture, [illegible] injects CO2 into cast concrete blocks in order to make them stronger while sequestering more CO2 and using less cement to boot.
- Three companies deal with radically different aspects of waste. [illegible] has a product line that detects and helps troubleshoot industrial odor pollution, a surprisingly big market. [illegible] repurposes obsolete telecom equipment for major corporations and is already in the black less than a year after launch. and [illegible] leverages existing but protected technology to provide broad waste solutions to companies, stadiums, racetracks and agriculture businesses.
- [illegible] is providing value by substantially improving the efficiency of rooftop HVAC systems. Instead of managing peak demand as most other vendors in this space do, they are focused on the low demand part of the cycle – which has a lot more benefit than one might expect.
- There are two wind energy companies. [illegible] has a vertical axis turbine that is actually in the field. Free Breeze is in rapid growth mode after installing small and community scale wind projects for over ten years.

I hope you'll have a chance to check these companies out. If you're interested in meeting with them directly, Lydia Pastuszek of Conover + Company Communications at [illegible] will be happy to facilitate the process. I hate that I won't be there, but I am on a long-planned vacation with virtually no internet access and won't be back in town until June 27.

Best regards,
Linda

Re: SPAM-LOW: Re: introduction to Andrew Schuyler

[illegible] to aschuyler, Dave1, gamechange, Christina.Carr, Shelley.St [illegible] Jun 14 (2 days ago)

Andrew

Since the Exhibit halls are not open until 2:2, the Canadian Consulate is offering space for meetings. I will set up your meeting with BDR for 11:30 at the Offices of the Consulate at 3 Copley Place, Suite 400, which are above the shops in Copley Place. You will be meeting with Ken Lawless, CEO, BFiR Technologies.

In case of any last minute changes, what is your cell number please?

Hope your session goes well today!

- Lydia

Andrew -

Ken Lawless of BDR would like to meet with you, Andrew. He has a meeting at 2:30 tomorrow afternoon at the Canada Pavilion, so possibly you could meet with him before your 1:30 session or afterwards. Another option would be to meet Wednesday before the luncheon. Please let us know which would work best for you.

Dave's cell number is [illegible]. Mine is [illegible]

Thank you

TechConnect meetings

[illegible] to [illegible] me Jun 10 (6 days ago)

Chet,

Here is your meeting schedule during TechConnect Boston. Please confirm that these work with your travel schedule and send me your cell phone number. I can be reached at [illegible]. The Museum of Science is about a 20 minute cab ride from the Hynes/hotels and other companies are involved (Corvis, FreeBreeze and Vbine) so perhaps you can coordinate and ride together. If I can help further, please let me know.

[illegible] to dwright, Marian Tyarada, me Jun 10 (6 days ago)

Dwight,

Here is your meeting schedule during TechConnect Boston. Please confirm that these work with your travel schedule and send me your cell phone number. I can be reached at 617-794-7260 or via email. The Museum of Science is about a 20 minute cab ride from the Hynes Center and most hotels. These meetings also involve Corvis, FreeBreeze and HydroStor so perhaps you can coordinate and ride together.

Corvis and HydroStor are battery/energy storage companies with the potential for partnering on remote wind turbine sites.

Re: Introduction to Mo Nariani - Mass Energy Lab

x Inbox x

[illegible] to mnariani, dwallace, Christine, bcc: me 6:29 PM (22 hours ago)

Mo, you will be meeting with Yvette and Clive Weber of GridCo on Wednesday June 15 at their booth in the exhibit hall around 12 noon. Their booth is 923. It is to the left and near the back.

I've also attached the invitation to the Canada Innovates' session and hope that you will join the program after your meeting - for lunch, the speakers, and the pitch sessions.

I look forward to meeting you! You have my cell number, 506-380-5890

Hi Lydia

Mo Nariani, President of Mass Energy Lab, would like to meet with GridCo - can we work out an "on the fly" meeting?

Mo is planning to be at the conference so perhaps they can meet at the Pavilion or when Yvette and Clive have free time.

I'll leave it with you!

Mo, Lydia is coordinating meeting times for the companies. - you're in good hands!

Chris

TechConnect

to Harvey, David, bcc: me 9:54 PM (18 hours ago)

Hola Harvey

Here is the link to registration

We also request that you register for the TechConnect conference directly at. Once you have entered all your information you will see a box for a discount code. Please register for the Expo Hall Only, using discount code "Canada", which will give you free access to the Exposition as well as the Canada Innovates! conference. If you are interested in registering for the whole conference, this code will also provide a $100 discount to the full program registration.

When you come in the Hynes, ride the escalators to the 2nd level. Then the registration desks are there and if you have preregistered it goes really fast.

I have also attached the program for the day tomorrow. If you manage to finish your proposal and can come over in the afternoon, I think you will find the program very interesting. Send me a text or call me when you are on your way.

I would like to arrange a brief meeting for you with this company that just joined the project today. Here is a link to their website.

Take care. Good luck with your proposal.

Hyde

Re: message from Chris - Consulate - request for help!

to science, David Jun 13 (2 days ago)

Carolo,

You will be meeting with Chris and Yvette Weeb of Ondeo on Tuesday morning at 10 am at the Concierge desk at the Sheraton.

My cell number is 626-460-5890

Thanks!

On Mon, Jun 13, 2011 at 4:[illegible] PM, lydia pastuszek [illegible] wrote:
Ok, I will aim for a 10 am meeting. The meeting space we have is in the Exhibit Hall so that won't work before 12. But I will find out where they are staying. The Consulate is at 3 Copley Place so it is very close by.

My cell number is [illegible]

On Mon, Jun 13, 2011 at 4:05 PM, [illegible] wrote:

I could meet in the Exhibit Hall, but would prefer if we meet at the Convention Center or at the Sheraton Hotel, unless the consulate is within walking distance.

Hello Carolo

I am trying to confirm a meeting time with my contact at Ondeo - she is probably enroute right now.

The exhibit hall opens tomorrow at 12. I know that you said the morning was better for you than the afternoon. In that case, I would arrange a meeting in the morning - say at 10 - and see if I can get you a meeting room at the Consulate. If not, would you be able to meet with them tomorrow afternoon - say at 1 pm at the Exhibit Hall?
